

DEXSAR[®] to Integrate with Iron Mountain's Archive Services Platform

DEXSAR customer information will be protected by Iron Mountain's enterprise-class cloud storage

RESTON, Va., March 15, 2010 — DEXSAR, a developer of online and software managed file transfer and data loss protection solutions, announced it has joined the Iron Mountain Developer Program to integrate Iron Mountain's Archive Services Platform into the DEXSAR service. All files delivered, shared and protected by customers using DEXSAR will be secured and easily accessible through Iron Mountain's cloud storage solution.

"For customers needing enterprise-class security and reliability, Iron Mountain's trusted and secure Archive Services Platform provides unparalleled data security, dependability and transparency," stated Todd Koopersmith, vice president of business development and strategic alliances for Iron Mountain Digital, the technology arm of information management services company Iron Mountain Inc. (NYSE: IRM). "The integration of the DEXSAR service with our solution will create a highly secure method to deliver, share and protect important data via the cloud. More than just secure storage though, our Archive Services Platform includes services for accessing and leveraging that data."

"We are pleased to participate in the Iron Mountain Developer program and are thrilled to integrate DEXSAR with the Archive Services Platform," said Gary Mueller, CEO, DEXSAR. "Our customers will benefit from the industry's leading solution for secure cloud storage that only Iron Mountain can deliver."

DEXSAR helps businesses reduce their risk of exposing company information with an easy-to-use and highly flexible service. It is designed for client facing organizations, including law firms, accountants, financial planners, medical facilities, and insurance agents who need to protect their clients' confidentiality but also need the efficiency and security of proactive measures. DEXSAR is the first Internet service in the industry to offer customers a data loss protection guarantee. This unique offering provides businesses with peace-of-mind when it comes to the risks associated with protecting clients' confidential information.

The Iron Mountain Developer Program offers application developers seamless integration with the company's Archive Services Platform through an Application Programming Interface (API) for secure, off-site long-term data storage for data-intensive applications, as well as information management functionality such as advanced indexing, search and retrieval capabilities and retention and destruction.

About DEXSAR
