

## Securely Send Private Information to Anyone with new DEXSAR<sup>®</sup> Express Feature

*DEXSAR now offers the ability to deliver confidential documents  
and files to anyone by introducing DEXSAR Express.*

HERNDON, Va., March 19, 2009 — Digital Now Inc., a pioneer in online and software managed file transfer and data loss protection solutions, has rolled out the latest version of the DEXSAR service, allowing accountholders to securely deliver any file or document to anyone in an instant with DEXSAR Express. With the DEXSAR Service users can deliver, share and protect any confidential or sensitive information within a trusted secure account network they create.

“A DEXSAR Account has always provided the ability to create secure private networks to share confidential information,” said Gary Mueller, CEO of Digital Now. “Now, by introducing DEXSAR Express, users can securely send this information to anyone – this easily replaces expensive overnight delivery and courier services. The instant delivery of any document or file greatly accelerates the speed of business, giving a business a competitive advantage.”

DEXSAR is easy-to-use and highly flexible. It is designed for client facing organizations, including law firms, accountants, financial planners, medical facilities, and insurance agents who need to protect their clients' confidentiality but also need the efficiency and security of proactive measures. With DEXSAR, businesses reduce their risk of exposing private client information. All businesses today are expected to protect the privacy of their customers' information and many have specific government regulations to follow including GLBA, HIPAA, PCI, and SOX. Protecting customers' private information is simply a sound business practice.

DEXSAR is the first Internet service in the industry to offer customers a data loss protection guarantee. This unique offering provides businesses with more than peace-of-mind when it comes to the risks associated with protecting clients' confidential information. Businesses can choose from a variety of flexible Account plans to meet their needs in sharing and protecting confidential information for their business and clients.

**Digital Now Inc.** is a pioneer in developing software and online solutions for managed file transfer and data loss protection with a strong history of technological innovation. The DEXSAR service provides trusted account networks to protect confidential, personal and critical information. A variety of financial and professional services, member-based and academic organizations use DEXSAR to help clients, members and students manage and protect their growing digital estates; including financial statements, legal and business documents, tax return filings, images, and wide range of important digital files. Currently, Digital Now serves customers in the United States, Europe and Australia. More information is available at [www.DEXSAR.com](http://www.DEXSAR.com).
